EDUCATION

Don Bosco Institute of Technology <i>Bachelor of Engineering in IT; SGPA: 8.67 (Sem III)</i>	Mumbai 2024 – 2028
Ramniranjan Jhunjhunwala College of Science <i>HSC in Science</i>	Mumbai 2022 – 2024

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, SQL
Web & App Development: HTML5, CSS3, Bootstrap, Django, Streamlit, Spring Boot, WordPress
Databases: MySQL, PostgreSQL, PostGIS, MongoDB
Tools & DevOps: Git, GitHub, Docker, Linux, VS Code, Postman
Other: Google Earth Engine, Unity Engine, Figma, Canva, Leaflet.js, OAuth2, Hibernate/JPA

PROJECTS

- GreenSetu** | *Google Earth Engine, Streamlit, Plotly, Pandas, Leaflet, Linear Regression*
- Built a web-based environmental monitoring platform to analyze mangrove degradation across the Mumbai Metropolitan Region using satellite and GIS data
 - Engineered geospatial data pipelines with Google Earth Engine to process and analyze multi-temporal satellite imagery
 - Implemented a linear regression model to generate predictive insights on degradation trends
 - Designed interactive visualizations and dashboards using Streamlit, Plotly, and Leaflet for real-time environmental analysis
- MediPin** | *Spring Boot, Spring Security, OAuth2, Hibernate, JPA, PostgreSQL, PostGIS, JavaScript, Leaflet.js*
- Developed a location-based emergency assistance platform to help users locate nearby hospitals within a 5 km radius
 - Implemented secure authentication and authorization using Spring Security with OAuth2
 - Used PostGIS for geospatial queries to power real-time navigation and proximity-based hospital search
 - Built RESTful APIs with Spring Boot and Hibernate/JPA, and integrated Leaflet.js for interactive map-based navigation
- Save'Em All** | *Unity Engine, Figma*
- Designed and developed a rescue-based mobile game where players save hostages by dodging obstacles and avoiding guards
 - Built core gameplay mechanics, level design, and obstacle/AI logic using Unity Engine and C#
 - Designed UI/UX mockups and game assets in Figma to improve player engagement and experience

LEADERSHIP & ACTIVITIES

Assistant Secretary, ACM Student Chapter <i>Don Bosco Institute of Technology</i>	Aug 2025 – Apr 2026
- Coordinated technical events and activities for the ACM student chapter, supporting member engagement and event logistics - Assisted in planning, documentation, and communication for chapter initiatives and workshops	

ACHIEVEMENTS

CodeResQ — Smart India Hackathon (SIH) 2025	Oct 2025
- Selected for the college-level round of Smart India Hackathon 2025 under the Transportation & Logistics theme - Designed a GPS-integrated public transport tracking system for small cities, featuring real-time bus tracking, ETA estimation, crowd-level reporting, and a CO2 “green score” to encourage public transport usage
